

DV3- Aluminum

DESCRIPTION:

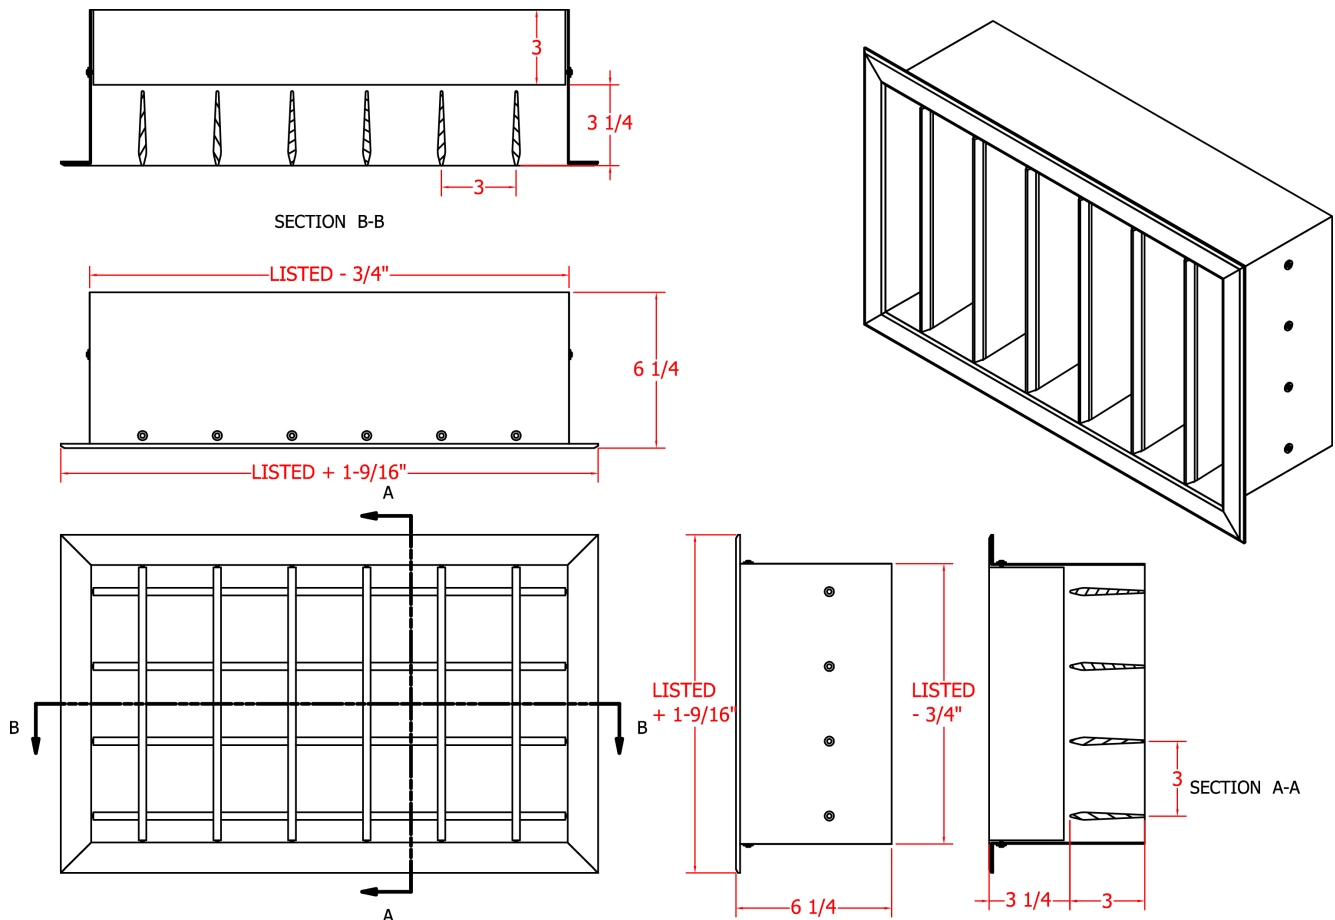

Inyection grille with aluminum extrusion vanes. Double deflection, with individually adjustable aerodynamic vanes, vertical front and horizontal on the back with a 3" between track centers, providing a maximum flexibility in the air pattern.

MATERIALS:

Aluminum extrusion vanes of high rigidity and frame in a black 18 gauge sheet steel.

FINISH:

Electrostatic baked paint (polyester) in Vermont white as standard finish, also available in gray aluminium and matte black without an extra cost. Foam seal in the frame to prevent dust stains, airtight plastic packaging with screws for set adjusting.
