

TYPICAL MOUNTING

DJ- Aluminum    DJA-Steel

DESCRIPTION:

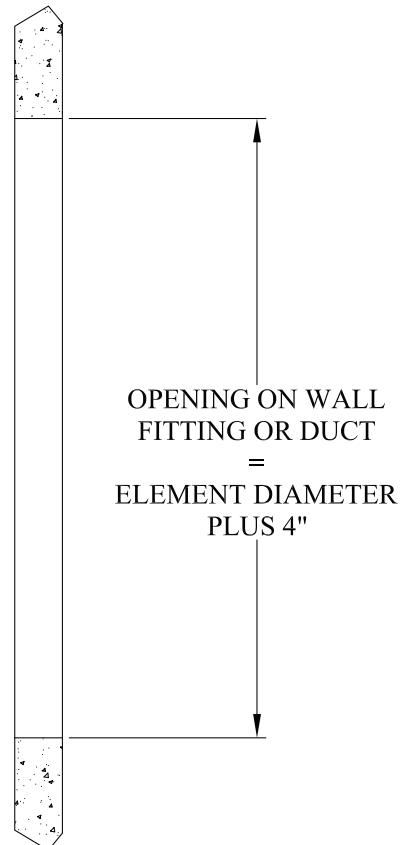

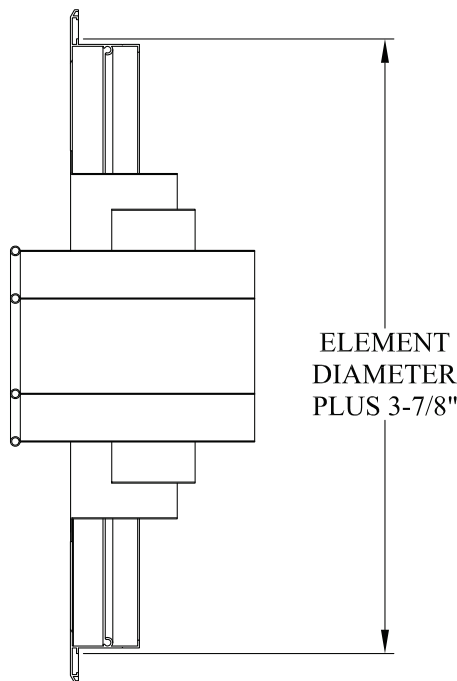

DJ model diffusers are designed for heating and air conditioning large spaces.

Available as individual injectors and rectangular panel. The injectors can be individually adjusted vertically and horizontally up to 30 ° perpendicular to the mounting panel.

With a large open area, provides air distribution with less noise and less pressure loss. Panel-mounted injectors are available from 1 to 4 injectors on a panel.

The range of diameters of the injectors is from 6 "to 14" in 2 ".
