

Filters FHE

SPIRO DUCT + FITTINGS + GRILLES + DIFFUSERS + **FILTERS** + FLEXIBLE DUCT + ACCESORIES

High efficiency absolute filters, designed for use in systems where clean, particle-free ambient conditions are required.

1 Principal Features

Materials:

Manufactured with galvanized sheet frame, filter media certified 99.97% of retention efficiency in particles equal or greater than 0.3 microns and corrugated aluminum foil support, all joined and sealed with adhesive.

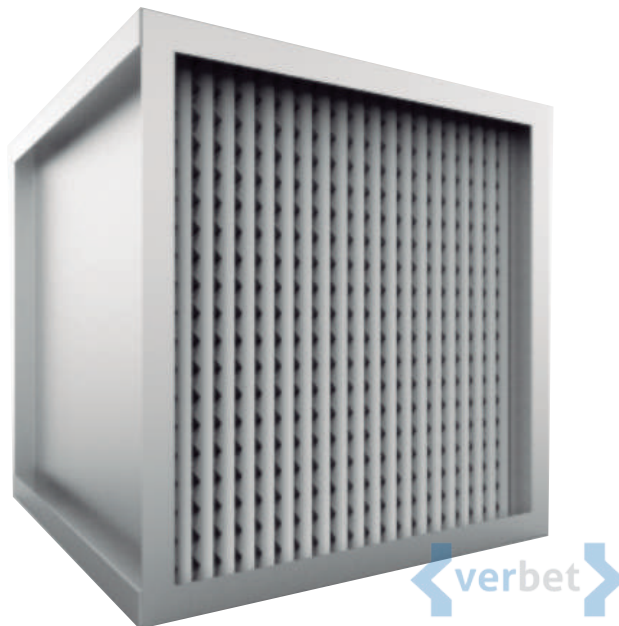

Applications:

Recommended for sterile areas that require absolute control of the environment such as in hospitals (operating rooms), pharmaceutical industry, electronic industry, food industry, etc.

Sizes:

Available in sizes from 12 X 12 to 24 X 48 inches and in 6 and 12 inches deep, with an efficiency of 99.97% for particles of 0.3 microns.

2 Views

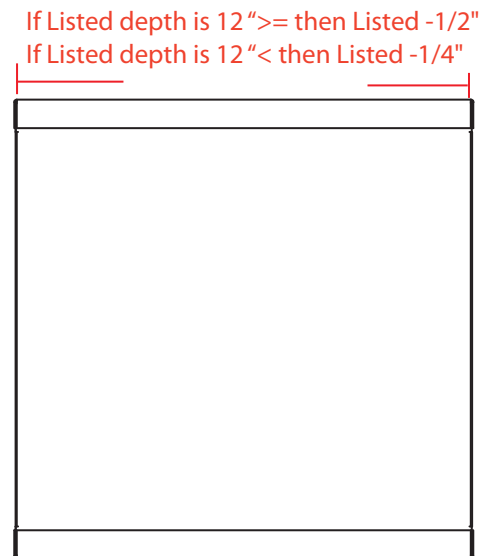

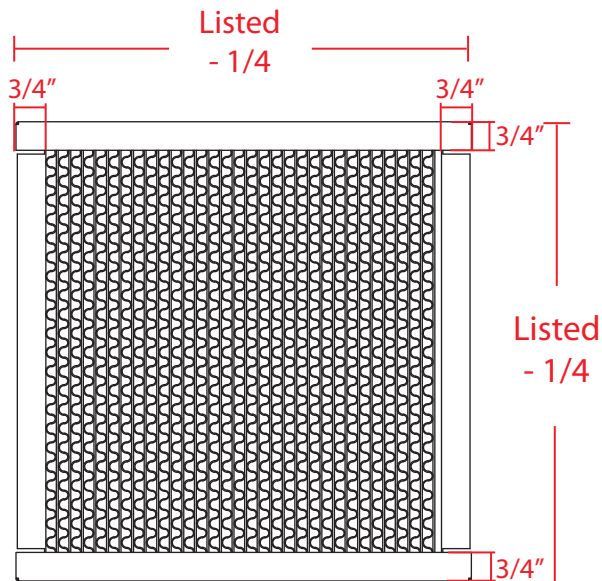

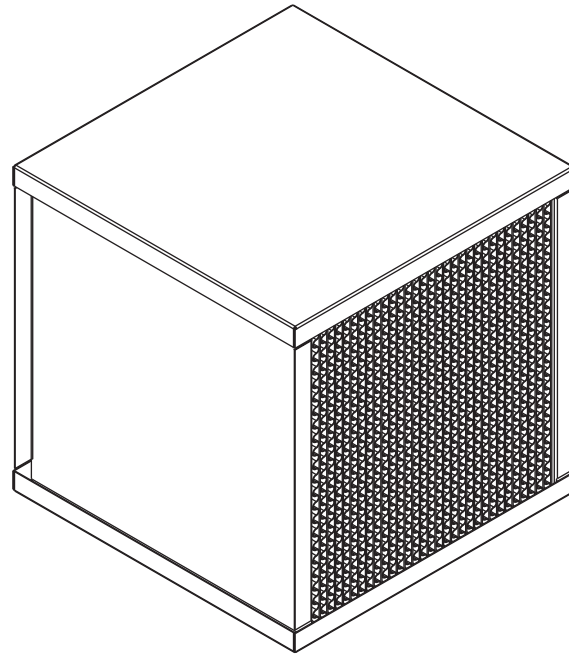

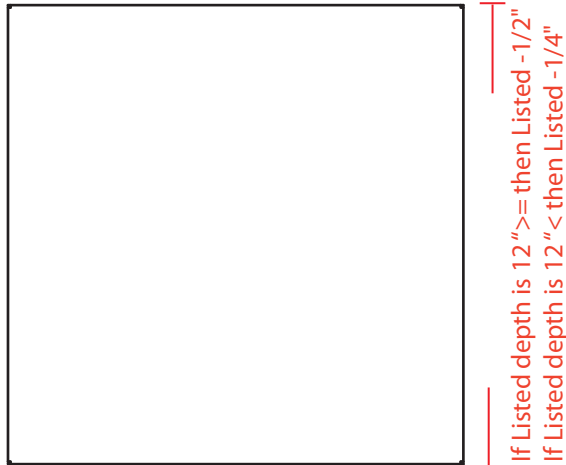

Packaging:
Individual hermetic plastic packaging

Important Note:

Once the filter is assembled,

HOT MELT glue is added between the frame and the media.
