

Damper CRHA Steel

SPIRO DUCT + FITTINGS + GRILLES + DIFFUSERS + FILTERS + **DAMPERS** + LOUVERS + ACCESORIES

Rectangular Damper constructed of galvanized steel, featuring a support for electric actuator installation (actuator not included).

Reinforced hardware allows the opposed blades to open and close simultaneously for smooth and easy operation. Each blade shaft is equipped with bushings for improved performance. The damper also features side seals and foam seals between the blades to help minimize air leakage.

Note: Electric actuators are available from stock for dampers up to 36" x 36" or 9 ft². For actuators required for larger damper sizes, please contact our Sales Department.

1 Principal Features

Materials:

Manufactured from galvanized steel.
Minimum G60 galvanizing.

Finish:

Galvanized Finish

Applications:

As an accessory for airflow control in ventilation ducts.
